

Enhancing well-being with good sleep habits

Avoid screentime
use at least half an
hour before going to
bed

Avoid large meals,
caffeine and alcohol
before bedtime

Avoid day-time
sleeping

Ensure adequate exercise

Establish a bedtime routine

Enhancing well-being with good sleep habits

Avoid activities in the evening which increase your heart rate such as high intensity exercise, drinking caffeine, watching horror or action movies, etc.

Create a relaxing pre-bedtime routine, such as taking a hot shower, reading a light book, taking a stroll etc.

Try to keep a consistent time for going to bed and waking up, and sleep in a cool, quiet and dark room.

Keep away phone, laptop, etc. at least an hour before going to bed.

Have dinner an hour before going to sleep and avoid foods that can disrupt your sleep, such as alcohol, spicy food, etc.

Engage in regular exercise
